

FillerStrip Closure Strips

Precut foam closure strips designed to close profile gaps in metal roofing and sidewall panels. Designed to withstand moisture, air movement, insects and UV rays. Tested in harsh climates to insure longevity. Profile specific cut to match specified corrugations.

Application:

Outside closures for applications between ridge cap and panel, Inside closures for applications at the eave or under roofing panels.

Features:

- Polyethylene foam construction with UV protection
- Does not scratch painted metal surfaces
- Available with or without adhesive for ease of installation
- Interlocking dove tails provide a secure end to end fit
- 100% Made in America
- Profile specific cut to closely match your panel
- 1.8 lb density

Specifications

TEST	STANDARD	RESULT
Tensile Strength	ASTM D3575	60
Elongation	ASTM D3575	124
Compression Set 50%	ASTM D3575	28
Temperature Range	In House Deg F	-100 to 200+
Shore Hardness	ASTM 2240	51
Water Absorption	ASTM D1667	1.04 K Factor
Flammability	AVSS 302	Pass
Country of Origin	Made in U.S.A.	N.A.F.T.A. Content 100%
